

Chest-organ. Lörrach (D)

New positif organ with 6 stops

Our first new organ in Germany is located close to our workshop, where the three countries CH-FR-DE meet.

The powerful sounds of the three principal and three flute stops fill the church with ease. All the pipes are made of wood. The instrument is used both during church services and for various other purposes where its versatility is required: choir and ensemble concerts, either as a solo instrument or in dialogue with the large Jahn organ in the gallery.

Truhensorgel Lörrach
